Forecast for Monday 09 Aug 2021

Weather: Cloudy start with wet conditions especially across eastern ranges including Black Mountains. Rain turning showery through the morning with some sunshine developing. A bright afternoon with a mixture of sunny spells and scattered showers, some heavy bringing risk of lightning. Showers gradually dying out late afternoon and becoming less frequent, with a mainly fine evening likely.

Chance of cloud free mountain/hill tops above 600m: 10% rising to 80% during the afternoon.

Visibility: Moderate to good outside of any showers when visibilities may drop suddenly to poor. Areas of cloud with bases from 500-600m, will lead to poorer visibilities on some slopes and summits during the morning. Cloud should break up more readily during the afternoon giving some temporary clearer spells near summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Continued risk of showers giving wet conditions through the day which will make walking conditions difficult underfoot – appropriate footwear and waterproofs are advised. Heavy showers with a risk of thunder will make conditions challenging at times. In addition brighter spells will give strong sunshine, so sun protection is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 08 Aug 2021	11.2mm	21.8mm	36.8mm

Forecast for Tuesday 10 Aug 2021

Weather: Cloudy with a few isolated showers during the early hours of the morning, these easing, leaving the area mostly cloudy by dawn. Skies breaking readily throughout the morning to give some sunny spells however still a risk of an isolated shower.

Maximum wind: Westerly 10-15mph

Chance of cloud free mountain/hill tops above 600m: 40% rising to 70% during the morning.

Visibility: Generally good, however cloud banks from 400-500m during the morning will limit visibilities near summits for a time. Sudden deteriorations in visibility are possible with the ever present risk of the odd isolated shower.

Temperature: **Valleys:** Plus 12 Celsius, rising to plus 18 Celsius.
At 600m: Plus 7 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
